

DIPARTIMENTO DI ARCHITETTURA E DISEGNO INDUSTRIALE

Seconda Università degli Studi di Napoli
Dipartimento di Architettura e Disegno Industriale
Luigi Vanvitelli

Corso di laurea in Architettura

Insegnamento: A00102 - ARCHITETTURA DEGLI INTERNI
a.a. 2013/2014

GRUPPO

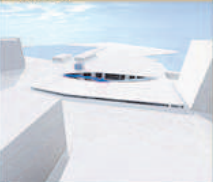

Vincenzo Caragallo - Giovanna Nichilo

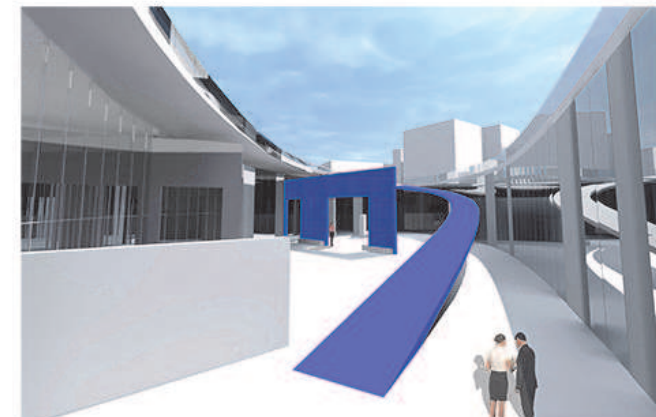

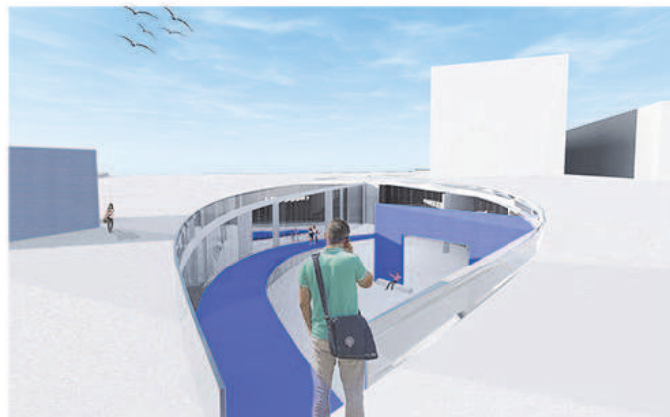

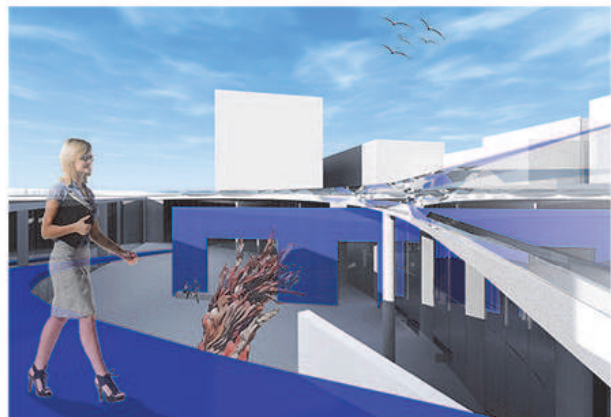

Vincenzo Zampella

PROGETTO

UNDERGROUND SQUARE MUSEUM
DOCENTE: PROF. ARCH. CLAUDIO GAMBARDILLA

ECO-SUSTAINABLE
WALL TYLING

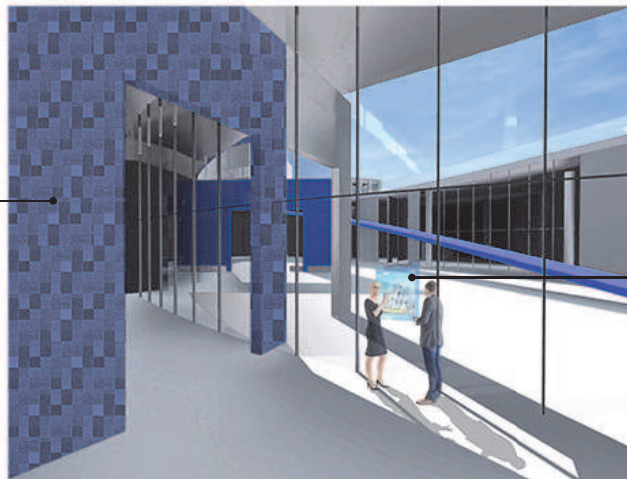

Ceramic Vogue system

Colour :

-Cielo - Blu Avio

-Oltremare -Cobalto

Product by Vogue ceramica

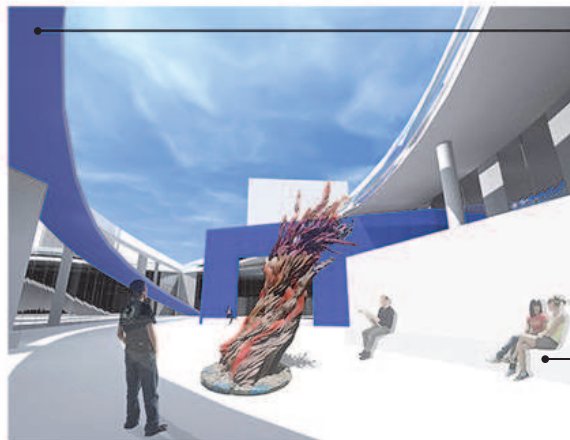

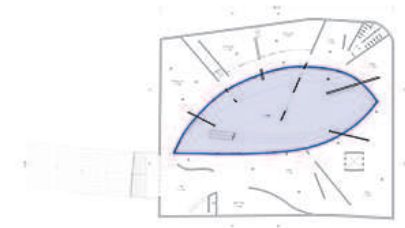

GLASS TOUCH
REVOLUTION

Size: 100 inch 16:9
Produced by Touch
revolution.

Thanks to a mechanism for back projection of holographic foils interactive showcase will come to life, making it bright and fully touch sensitive. The holographic foils reproduce the effect of having an image suspended in space, while the touch-screen will give life to the glass sheet.

THE SQUARE

TILLING
CORIAN SOLID SURFACE
Color: white, blue
Size: 3660x760x19 mm
Product by Dupont Company

Resistance: heat, UV rays, salt
It is a composite material formed by 2/3 of minerals and 1/3 of acrylic resin with eventual addition of color pigments.

TRASLUCENT CEMENT
WITH FIBER OPTICS
Color: Blue
Size: 120x60x4
Product by Luccon
Lichtbetonen

Population density: 2100 kg / m³
Resistance to fire: Class A2
Resistance: frost, defrost, UV rays, salt
It is a prestressed concrete panel translucent. Luccon is composed of fine-grained concrete and fiber optics. The amount of fibers relatively limited, makes Luccon solid and consistent as the high strength cement. Optical fibers allow light, shadows and colors to filter through the concrete, although considerable thickness.
